Open Ended Comments

List at least two things positive about this course:

Comments
Flexible times to do projects, mini projects, and exams.
We go over things in class. Can go over anything.
Exams are very similar to projects and mini projects. This helps make studying easier.
Professor Bowen tries and I can appreciate the effort. I think that he wants to be accommodating to students which is nice as well.
surprisingly easy and well explained
plenty of time to complete assignments
Helped me understand and math a little bit more great examples for sections
Increases my knowledge
1. The teacher was always there to help 2. The teacher explained things clear enough
1. He didn't miss a single meeting and taught through the whole thing. 2. He seemed to genuinely care and love what he teaches.
I liked our weekly meetings and I appreciate how he helped us with actual questions and really wanted us to learn.

List at least two things that would improve this course:

Comments
Talk about homework more and go over it.
Specify formatting more for exams, projects, and mini projects.
I think that the course needs to be formatted better. I had multiple times where I was marked off for tests and quizzes simply due to formatting issues. The formatting was never spoken about and it was very strict. I think that he will get better at making tests, but this was very irritating because you don't know if you got the problem wrong or it was entered wrong.
the homework is so heavy and time consuming.
my pearson lab assignments doesn't always reflect what's being taught
Maybe go over notes a little more If possible lecture a little bit more
Nothing
1. If the teacher could make the notes more clear 2. If the class was a bit more interactive
1. I did not think that having to pay for a MyPearson account was worth it, as only some of our homework was on there and it didn't do anything canvas couldn't
Nothing
